

ESD ANALYSIS REPORT

ESD MAGAZINE

ESD Magazine Measurement Results:Requirements: $7.5 \times 10^5 - 1.0 \times 10^{10} \Omega$ Result: $10^8 \Omega$

ESD Inspection:

Inspection
conclusion:**Qualified**

Inspector / Judgment date: Jul 15 2023

Jason Wu
王宇**CONCLUSION:**

According to the results obtained from the surface and ground resistance measurements and the resistance to ground through a grounded table mat, we conclude that:

- The material of Magazine has conductive properties.
- The Magazine has properties to conduce the charges to ground.

Therefore the magazine is accepted to be used in ESD control areas.
