Add: Room 1806 Block 3 Jinyun COFCO, Qianjin 2nd Road , Xixiang, Baoan District, Shenzhen , China

S-CC200 Automatic SMT components counting machine

SMD reel counter introductions:

- 1.Full automatic counting, high accuracy, no error.
- 2.No risk of damage the tapes, we have designed to prevent it from dropping.
- 3.Count forward and backward,double-checking ensures accuracy,built-in memory allows you to preset count quantity.
- 4.The counter use drafting LCD screen, easy operating, full English display.
- 5.Use patent reflector,humanized operation platform.
- 6.Install bar code, convenience electronic component management.
- 7.Optical fiber sensor detect leak ,motor will stop working when detected leak.

Reel SMD Chip Counter :

Bi-directional counting, will subtract count when the direction of the tape is reversed.

Tape pitch from 2mm upwards, ideal for counting 0201, 0402 etc.

Reel widths from 8mm to 72mm.

Simple operator interface simplifies pitch setting.

Makes an ideal tape inspection platform in addition to its counting function.

Rigid metal construction with a wide, sturdy base.

Portable and easy to use

It is used for counting taped electronic smd components/parts,like capacitor, resistor,etc

Components pitch: 2,4,8,10,12,16,20,24,28,32,36,40,44,48,52,56 mm

Width of tape:8, 12, 16, 24, 32, 44, 56mm

Specification

Power :AC110V or AC220V(Can be changed)
Function:200CM 600PCS /minute
Rated power:30W
Meter number:-99999~99999pcs
Dimension:L350*W774*H184mm
Weight:10kg
Strip wheel diameter: any SMD strip wheel size all can use
Pitch:2,4,8,10,12,16,24,32,44,56mm Loop setting
Tape width:8,12,16,24,32,44,56mm

Suitable for electronics production factory, SMT processing factory, SMD parts manufacturer, SMD parts supplier, and other industries related to electronic components.

- 1, high precision, count zero error;
- 2, SMD gm volume packaging components are applicable.
- 3, direction, all can count, repeat check function; Can be preset number.
- 4, the operation is simple, unique anti strip off design minimize the harm of strip. Patent design: tilting the operation panel of the users can see the screen at the same time of loading components, more accord with human body engineering.
